## Foresight and Courage

Automobile values as at present established are largely due to the foresight and courage of Mr. John N. Willis, the president of this institution.

He foresaw the universal use of the automobile and had the courage to produce quality cars in larger quantities than they had ever before been produced.

Steadily increasing production made possible savings and economies which steadily reduced costs and repeatedly established new values.

Eight years ago, with a net worth of little more than \$50,000 this company produced 465 cars.

This year, with a net worth of over \$68,000,000 we must produce over 200,000 cars to fill our dealers' contracts.

It has required an enormous investment in plant and equipment to prepare for this enormous production.

The prime requisite in the automobile industry is still foresight and courage.

Mr. Willis foresees a demand this year in excess of the possible supply.

In addition to enormous investment in plant and equipment Mr. Willis had the courage to contract long ago for enormous quantities of raw materials—\$35,000,000 worth already in hand for this year's record production.

See all this reflected in the values we have to show you in the most comprehensive line of cars ever built by any one producer.

Note especially the remarkable values represented in the Big Four at \$850 and the Light Six at \$985.
